The gift of a micro-enterprise business project for a widow in Uganda has been given in your honor!

Rural communities in Uganda lack opportunities for income, social interaction and community-building activities. All widows in our economic development program have an equal voice in determining new strategies for their business projects. For their next project, the women voted unanimously for a hair salon. "What better way to build friendships within ROWAN and the larger community?"

"Every woman desires to be beautiful!"

A gift to help stock the salon with hair supplies and bring the widows hope, beauty, new skills and local profits has been given in your name!
