The gift of a more secure financial future for orphans and widows in Uganda has been given in your honor!

Sixty percent of ROWAN widows and widowers are older than 55 and physically unable to farm their own land. The majority also live with HIV/AIDS and need alternative methods to provide for their families. At their suggestion, ROWAN is planting 30 trees per household as a sustainable income project. In time, families will make useful profits from selling firewood. 30 trees for a family have been given in your honor as we help plant the seed for a stronger financial future!
