A gift of clean, safe drinking water for widows and orphans in Uganda has been made in your name!

In 2009, the people of Mawanga, Uganda suffered a devastating outbreak of typhoid after the village's only well stopped delivering water. To avoid future outbreaks and ensure a continuous supply of safe water, ROWAN is installing new water wells throughout the community. Greater access to safe water will bring good health, agricultural growth and ease of everyday tasks to the village. The refreshing gift of clean water has been made in your honor through contribution to a new water well.
